

## Release Notes 2.2.6

November 29, 2004

The following items have been moved (migrated) to Production for use by Agencies beginning on November 29, 2004.

- An online edit was added to prevent users from entering/changing work schedule and/or standard hours to anything other than what is on Position Data. This will enforce the requirement that work schedule and standard hours are to be consistent between the position record and the employee's record. If a user needs to change work schedule and/or standard hours, the user must first update the position data and then the employee's record.
- An online modification was added to allow users to enter a dollar amount in the additional amount adjustment field for Puerto Rico on the state tax page.
- An online edit to was added to make country, address, city, state and zip code fields required on an employee's personal data record. Please note that Geographic Location is already a required field on the employee's personal data record.
- The NIH Special Rate table 0N12 was updated to reflect the correct values.
- A fix was made to the Financial Institution Employee process. Previously, the process was processing changes to allotments using the last day of the pay period for a stop action and the first day of the pay period for a start action. This caused employees to not have a direct deposit for the pay period in which they made the change. The program has been updated to process stop transactions on the Friday before the pay period ends and start transactions on the Saturday of the pay period end.
- A fix was made to the overtime rate for Title 38 employees. The overtime rate is now correctly calculated as 1.5% of their hourly rate. A list of Title 38 employee's will be distributed to the appropriate OPDIV's.
